

“WELLCAL-K2” TAB

Composition:

Nutritional Information (Approx):	
Each Film Coated Tablet Contains	
Calcium Citrate Maleate	500 mg
L-methyfolate	1 mg
Boron (as Calcium Fructo Borate)	1.5 mg
Methylcobalamin	1500 mcg
Vitamin K2-7	45 mcg
Cholecalciferol	1000 IU
Zinc Sulphate Monohydrate	7.5 mg
Eq. to Elemental Zinc	2.73 mg
Manganese Sulphate	1.5 mg
Excipients	q.s

Packaging:

- ❖ 15 tablets in one Blister Strip.
- ❖ 2 Blister Strip in one Carton.

Short Description:

- ❖ **WELLCAL K2** contains Vitamin K2 in its most biologically active form called Menaquinone-7 (MK-7).
- ❖ Vitamin K2 plays a critical role **in maintaining healthy bone density** by facilitating the transport of calcium from the bloodstream into the bone.
- ❖ Vitamin K2 is also required by **calcium-regulating proteins in the arteries.**

Supports Bone Density & Promotes Healthy Bones

WELLCAL - K2 TAB

Calcium Citrate Maleate 500 Mg, L-Methylfolate 1mg, Boron 1.5mg, Methylcobalamin 1500mcg, Vitamin K2-7 45mcg, Cholecalciferol 1000IU, Zinc Sulphate 7.5mg, Manganese Sulphate 1.5mg

CALCIUM CITRATE MALEATE

- 700 times more soluble & 37% higher absorption
- Has pH independent absorption

VITAMIN K2-7 is the most important function is to regulate calcium deposition increases mineral density and decrease fracture rates.

METHYLCOBALAMIN and **L-METHYLFOLATE** corrects hyperhomocysteinemia.

BORON improves joint health

CHOLECALCIFEROL helps in calcium absorption

SUPERIOR CLINICAL MANAGEMENT OF

SENILE OSTEOPOROSIS

POST MENOPAUSAL OSTEOPOROSIS

FRACTURES

LONG TERM CORTICOSTEROID THERAPY
